350cm (137")	2	2	12	36
500cm (196")	3	3	18	48

What the parts do

Part				
Description	Left Hand Track End Cover	Right Hand Track End Cover	Keylock Support	Track Glider
Use	Neatens the cut end of the track and also acts as an end stop.	Neatens the cut end of the track and also acts as an end stop.	Fits to the wall or ceiling and the track then clips onto it beforelocking in position.	Clips onto the track and allows the curtains to open and close.

Streamline coiled curtain track instructions

Approximate sizes

30cm/12"(+/-)   30cm/12"(+/-)   30cm/12"(+/-)

1 Mark and fix the supports and equal distance apart in the desired position. Trim track if needed to desired length.

Top

Reverse

LEFT   RIGHT

2 Make sure the track is the correct way up (see diagram of track) Slide the curtain track into the Track end cover and tighten the small screw behind the end stop.
Please Note: There is a left and right Track end cover.

3 Ensure the Keylock Supports are in the **unlocked** position

4 Clip the curtain track on to the keylock supports and lock by pushing the toggle to the horizontal position.

5 Hook Gliders through curtain tape and fasten on to the track by hooking over the top of the track (A) before clipping underneath (B) to secure.

6 Hook the curtain over the End stop to create a tidy finish and secure the curtains in place.

How to Bend

Gently bend the track to desired shape.
Practical Tip: Use your knee to ease the bending process and generate a smooth bend.

Connector - sold as an accessory

How to Join

Ensure the toggles are in the open position (horizontal) before positioning and sliding into the first piece of track. Rotate the toggle to lock into place.

Slide second piece of track into postion and lock in place.

PLEASE NOTE: A support should not be placed at the join. Tracks should be joined at the centre of the window using the factory cut ends, and trimmed equally at the outer ends.
